## Continuation Sheet (PTOL-303) 09/624,076

Application No.

Continuation of 2. NOTE: Applicant's argument that the Examples and Tables on p. 6 to 9 and description in the specification are sufficient to enable a programmer to develop the software for oprating a subject system with no more than routine experimentation is not persusive. The disclosure fails to provide enabling disclosure in full, clear, concise, and exact terms how a computer model or algorithm would carry out simultaneously the primary and the secondary auction and compelting sales in the primary auction based on sales results in the secondary auction. The disclosure fails to provides no such teaching and therefore it would require more than a routine experimentation for a programmer to develop a softwar and further to implement such a complex invention on a hardware platform.
